Objection to the proposed Regulations Relating to the Labelling and Advertising of Foodstuffs

I object to the proposed Regulations Relating to the Labelling and Advertising of Foodstuffs. My comments are relevant to the consideration of these regulations because I am a South African sugarcane grower, and my business will be affected.

I object to the proposed regulations because (why are the regulations a bad idea)

My business has real benefits for the economy because (how does your business help your community i.e. the number of people you employ)

These regulations will hurt my business because (how will the regulations affect you i.e. revenue lost, job losses, making your challenges worse)
